

# Enamel Badge

Our Enamel Badge is an exciting promotional product idea that can be fully customized. Crafted from premium zinc alloy for a durable and professional finish, the Enamel Badge is perfect for corporate giveaways, promotional events, employee recognition and brand merchandising. Both Hard and Soft branding options are available - Hard enamel products have a flat, polished surface, whereas soft enamel products display raised metal lines with slightly recessed enamel areas. The back of the badge features a secure pin, to affix to your shirt, blouse, jacket or more. Get in touch today for more information about branding, prices and our express delivery times.
